ZAY YAR PHONE PAI

FULL- STACK WEB DEVELOPER

Bangkok, Thailand | +66 80 485 3728 | zayyarphonepai95@gmail.com Portfolio
| LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full-Stack web Developer with 8+ years of experience designing, building, and scaling web applications across PHP (Laravel), Python (Django), Vue.js, React, and Next.js. Proven track record delivering RESTful APIs, e-commerce platforms, and logistics systems for clients ranging from startups to government agencies. Strong focus on performance, security, and clean, maintainable architecture. Currently pursuing a B.Sc. in Computer Science at the University of the People.

SKILLS

Languages & Frameworks: PHP (Laravel), Python (Django), JavaScript (Vue.js, React.js, Next.js), CSS (Bootstrap, TailwindCSS)

Databases: MySQL, PostgreSQL, Redis, MongoDB

Core Expertise: RESTful APIs, Web Security, Debugging & Testing, Scalable Architecture

Tools: Git, GitHub, CI/CD, Project Management

Soft Skills: Problem-Solving, Teamwork, Communication, Time Management, Continuous Learning

WORK EXPERIENCE

Full-Stack Web Developer (Independent Projects) *Apr 2024 – Present*

Independent

Social Aether — Full-Stack Social Network Platform

- Designed and built a full-stack social networking platform end to end, pairing a React 19 + Vite + TypeScript frontend with a Laravel 13 API backend.
- Implemented core social features including feeds, threaded/nested comments, likes, bookmarks, reposts, follow suggestions, and real-time notifications.
- Built a trending-hashtag discovery engine and a token-based authentication system using Laravel Sanctum.
- Architected a decoupled, API-first backend with a normalized schema supporting reposts, infinite comment threading, and event-driven notifications.
- Applied AI-accelerated development workflows to speed up iteration while maintaining clean component architecture and typed frontend code.

Personal Portfolio

- Architected a high-performance personal portfolio site using React and Vite, deployed via Vercel's global edge network.
- Implemented a mobile-first, responsive design with Tailwind CSS for consistent cross-device UX.
- Optimized build performance and asset delivery, and structured a modular, maintainable component library.

TasteBoat — Food Discovery Platform

- Engineered a decoupled food discovery platform using React.js, Vite, TypeScript, TailwindCSS, and a headless Laravel API.
- Built a centralized RESTful API to manage complex menu hierarchies and secure user authentication.
- Improved frontend performance and SEO through server-side rendering (SSR) and responsive design.
- Set up a cloud-native CI/CD pipeline, deploying the frontend to Vercel and the backend to Laravel Cloud.
- Designed a MySQL schema optimized for high-frequency data retrieval and transaction integrity.

Career Break: Caregiving *Aug 2022 – Mar 2024*

- Took a planned break to care for a family member, while continuing to build technical skills through Harvard's CS50x (completed December 2024) and self-directed learning.

Full-Stack Web Developer (Freelance) *Oct 2020 – Jul 2022*
Heaven Melody Co., Ltd. — Myanmar

E-Commerce Platform

- Diagnosed and resolved critical bugs and system errors to improve platform stability.
- Migrated product and media assets to a new image server, improving load times and storage efficiency.

Job Portal Platform

- Developed backend and frontend features across core modules end to end.
- Built admin-side tools for monitoring user activity and platform health.

Full-Stack Web Developer (Mid-Level) *Oct 2019 – Oct 2020*
Za Information Technology Co., Ltd. — Myanmar

- Designed, developed, and maintained internal and public-facing websites for logistics operations.
- Built custom real-time dashboards for tracking shipments and delivery status.
- Integrated third-party APIs for mapping, tracking, and notifications to automate logistics workflows.
- Developed secure authentication and role-based access control (RBAC) systems.
- Optimized site performance and resolved technical issues to maintain system stability.

Full-Stack Web Developer (Freelance) *Aug 2019 – Oct 2019*
Melo Music App — Myanmar

- Developed and maintained a music streaming web application using Laravel and Vue.js.
- Implemented a custom music player and flexible subscription plan logic.
- Integrated Apple In-App Purchases and built RESTful APIs for mobile integration.

Full-Stack Web Developer *May 2016 – Aug 2019*
Mega Myanmar Links — Myanmar

- Built and maintained applications using Laravel, PHP, Vue.js, MySQL, Redis, MongoDB, and Bootstrap.
- Improved website performance through front-end and back-end optimization.
- Applied responsive design principles for consistent display across devices.
- Created reusable APIs, code libraries, and database structures for third-party integrations.

EDUCATION & CERTIFICATIONS

B.Sc. Computer Science (In Progress) *Currently*
University of the People

CS50's Web Programming with Python and JavaScript *July 2025*
Harvard University

CS50x — Introduction to Computer Science *December 2024*
Harvard University

Web Professional Advanced *May 2015*
Myanmar Links, Yangon

Web Professional Foundation *September 2014*
Myanmar Links, Yangon

High School Diploma *2012*
No. 1 Basic Education High School Dagon, Yangon, Myanmar

PROJECT PORTFOLIO

Independent Projects

- Social Aether (github.com/saseuz) — Full-stack social network with React/Vite/TypeScript frontend and Laravel API backend, featuring feeds, threaded comments, notifications, and trending discovery.
- Personal Portfolio (zypp-portfolio.vercel.app) — Modern, high-speed portfolio built with React, Vite, and Tailwind CSS.
- TasteBoat (tasteboat.vercel.app) — Decoupled food discovery platform with a headless Laravel API and SSR React frontend.

E-Commerce Projects

- Pacific-AA Online Shop (onlineshop.aa.com.mm) — Full-featured e-commerce site with secure registration and responsive design.
- HeavenMall (heavenmall.net) — Full-scale multi-vendor e-commerce platform with optimized media delivery.

Logistics & Government

- Myanmar Post & Logistics (myanmarpost.com.mm, sbs.com.mm) — Real-time logistics dashboard handling 500+ daily shipments with RBAC.
- Myanmar Parliament — Official government platform for parliamentary transparency (project offline).

Library & Education

- Sarpaybeikman Digital Library (sarpaybeikman-pol.gov.mm) — Government digital library with searchable e-books.
- SPSU University Portal (spsuygn.edu.mm) — University portal with digital library functionality.

Music & Entertainment

- Melo Music Streaming (melomm.com) — Streaming platform with subscriptions, custom player, and mobile APIs.

Corporate Websites

- AA Medical Products Ltd. (aa.com.mm) — Corporate website for Myanmar's leading healthcare distributor.
